POINTPULSE

Enterprise Performance & Rewards Management Platform

ADMINISTRATOR OPERATING MANUAL

Enterprise Governance, User Approvals, Portfolio Assignment & System Configuration

TARGET AUDIENCE: SOLE ADMINISTRATOR (001.WORKME@GMAIL.COM)

DOCUMENT SPECIFICATIONS & GOVERNANCE

Official Release: November 2026 (Platform v2.4)

Live Production URL: https://pointpulse-8bbn.onrender.com

Governance Model: Single-Administrator Authority (001.workme@gmail.com)

Primary Operator: laptopmew1@gmail.com

Security Architecture: Zero Plain-Text Password Exposure • Bcrypt Authenticated

Security Notice: Confidential internal documentation. Do not distribute externally.

PointPulse Platform Operating Manual • Enterprise Edition

1 Single-Administrator Governance Architecture

PointPulse operates under an uncompromising single-administrator security model designed to eliminate privilege escalation, unauthorized promotions, and administrative credential compromise.

> **Enforced Administrator Identity: 001.workme@gmail.com**
> The platform hardcodes the sole administrator identity to 001.workme@gmail.com at the database schema, middleware, and API levels. The system strictly prohibits the creation, invitation, or elevation of secondary administrators. All administrative endpoints require valid session tokens belonging exclusively to this identity.

2 Administrator Sign In & Dashboard Access

The Administrator can log into PointPulse through either:

- **Direct Credentials:** Enter 001.workme@gmail.com and your master administrator password under the "Sign In" tab.
- **Google OAuth 2.0:** Click "Continue with Google" while logged into your verified 001.workme@gmail.com Google account.

3 User Management & Operator Onboarding

All operator registrations are routed through the Administrator approval workflow before any dashboard access is permitted.

Step-by-Step Approval Procedure

- **1. Open User Management:** Click "User Management" in the left sidebar.
- **2. Review Pending Queue:** Inspect the "Pending User Approvals" table showing applicant name, email, and registration timestamp.
- **3. Approve Applicant:** Click the green "Approve" button. The system immediately activates their profile and grants an initial Free Editing Window.
- **4. Reject Applicant:** Click "Reject" to deny access and purge unauthorized registration attempts.

Granular Operator Permissions

On the Active Operators table, click "Permissions" on any operator row to customize their capabilities:

- **Can Add Accounts:** Controls whether operator can provision new accounts during active windows.
- **Can Edit Points:** Controls whether operator can manually update points.
- **Can Redeem Rewards:** Controls whether operator can claim reward vouchers.
- **Suspend Operator:** Clicking "Suspend" immediately invalidates the user's active session and prevents API access.

REAL-WORLD EXAMPLE: Primary Operator Profile Configuration

Operator Name:	`Laptop Mew`
Operator Email:	`laptopmew1@gmail.com`
Account Status:	`ACTIVE (Approved)`
Assigned Accounts:	`100% of Master Database Accounts`
Permissions:	`Full Operator Privileges (Add Accounts, Edit Points, Redeem)`

4 Account Ownership & Bulk Migration ("Assign All")

The Administrator retains total authority over which operator owns which accounts.

The "Assigned Operator" Column & Filter

- **Assigned Operator Column:** In the "All Accounts" view, every row explicitly reveals the operator email assigned to that profile.
- **Filter by Operator:** Use the dropdown filter at the top of the table to isolate accounts owned by laptopmew1@gmail.com or unassigned accounts.

Reassigning Single Accounts

To reassign an individual account:

- **1. Edit Row:** Click the "Edit" button on the account row in All Accounts.
- **2. Select Operator:** In the "Assign Operator" dropdown, select the target user (e.g. laptopmew1@gmail.com).
- **3. Save:** Click "Save Changes". The account immediately moves into the new operator's dashboard.

Bulk Migration: "Assign All to User" Feature

> **One-Click Enterprise Data Migration**
> To migrate all existing accounts in the platform to a single primary operator (such as laptopmew1@gmail.com), use the dedicated bulk migration tool.

- **1. Click Bulk Action:** On the All Accounts toolbar, click the purple "Assign All to User" button.
- **2. Choose Target User:** Select laptopmew1@gmail.com from the modal dropdown.
- **3. Confirm Transfer:** Click "Confirm Transfer". The system executes an atomic transaction reassigning 100% of accounts and logs the migration in the immutable audit trail.

5 Free Editing Period Governance

The Administrator defines the duration and rules for operator write-access windows.

- **1. Open Settings:** Click the "Free Editing Periods" button on the All Accounts toolbar.
- **2. Global Default:** Configure the standard window granted to newly approved operators (e.g. 24 Hours, 48 Hours, or 7 Days).
- **3. Auto-Start Rule:** Toggle whether newly approved users automatically start their timer upon registration approval.
- **4. Grant Custom Window:** Select an individual operator (e.g. laptopmew1@gmail.com) and grant a customized window (e.g. 12 Hours) to allow account adjustments.

6 Old / New Classification Board (Kanban)

Navigate to "Old / New Board" in the sidebar to access the visual account tenure interface:

- **Drag-and-Drop:** Drag account cards between the "OLD ACCOUNTS" and "NEW ACCOUNTS" columns to instantly update classification.
- **Batch Move:** Select multiple accounts and click "Move to OLD" or "Move to NEW" to perform bulk reclassifications.

7 Points Management & Access Governance

Under "Points & Access", the Administrator monitors real-time points activity across the entire platform:

- **Live Active Windows:** View which operators currently have active points-editing windows.
- **Emergency Revocation:** Click "Revoke Window" at any moment to instantly terminate an operator's editing session.

8 Master Reward Catalogue & Redemption Fulfillment

Navigate to "Reward Catalogue" to manage the rewards portfolio:

- **Add New Reward:** Click "+ Add New Reward" to specify Reward Title (e.g. $50 Amazon Gift Card), Category, Points Required, and Stock Count.
- **Publish / Unpublish:** Toggle whether rewards are visible to operators in their catalogue.
- **Account Matching:** Navigate to "Account Matching" to see which operator accounts meet points criteria.
- **Approve Redemptions:** Review operator redemption claims and click "Approve & Fulfill" to deduct points and issue rewards.

9 Notification Center & Request Approvals

The Notification Center serves as the Administrator's central decision inbox:

- **Account Correction Requests:** Review operator requests to fix server names or account details. Click "Approve" to apply the correction automatically.
- **Points Window Requests:** Review operator requests for editing time. Click "Approve Window" to unlock their countdown timer.

10 Executive PDF Generation & Download Center

Under "Download Center", generate branded, publication-ready reports:

- **Executive PDF Report:** Produces a multi-page PDF document featuring KPI overview cards, points distribution charts, operator performance summaries, and full account rosters.
- **Full Database CSV:** Exports the raw master database table into a CSV file for backup or external spreadsheet analysis.

11 Immutable Security Audit Logs

Navigate to "Audit Logs" to review the tamper-evident chronological ledger:

- **Tracked Events:** Every login, approval, account creation, edit, bulk migration, points change, and window grant is recorded.
- **Audit Metadata:** Includes exact ISO timestamp, actor email, action type, target account, and IP address.

12 Google Cloud OAuth 2.0 Configuration Guide

To ensure Google Sign-In operates flawlessly on the live production domain:

- **1. Open Console:** Navigate to Google Cloud Console !’ APIs & Services !’ Credentials.

- **2. Open Client ID:** Select Client ID: 162534616388-ko0lpc0r6cpor5vb8tv23aodamelv9mv.apps.googleusercontent.com
- **3. Authorized JavaScript Origins:** Add https://pointpulse-8bbn.onrender.com (without trailing slash).
- **4. Authorized Redirect URIs:** Add https://pointpulse-8bbn.onrender.com and https://pointpulse-8bbn.onrender.com/api/auth/google/callback
- **5. Render Environment:** Ensure GOOGLE_CLIENT_ID is saved in your Render Environment Variables.
