OPERATOR & USER MANUAL

Comprehensive Step-by-Step Operating Guide for Account Managers, Operators & Team Members

TARGET AUDIENCE: OPERATORS & ASSIGNED USERS (E.G. LAPTOPMEW1@GMAIL.COM)

DOCUMENT SPECIFICATIONS & GOVERNANCE

Official Release: November 2026 (Platform v2.4)

Live Production URL: https://pointpulse-8bbn.onrender.com

Governance Model: Single-Administrator Authority (001.workme@gmail.com)

Primary Operator: laptopmew1@gmail.com

Security Architecture: Zero Plain-Text Password Exposure • Bcrypt Authenticated

Security Notice: Confidential internal documentation. Do not distribute externally.

PointPulse Platform Operating Manual • Enterprise Edition

1 Platform Overview & Role Responsibilities

PointPulse is an enterprise rewards, points tally, and multi-user account management platform. As an Operator, you are granted full operational control over your assigned portfolio of accounts. Your primary duties include monitoring account health, keeping points current, importing new profiles, requesting corrections, and claiming reward redemptions.

> **Zero Plain-Text Password Standard**
> For institutional security, account credentials stored in PointPulse display proxy configurations, servers, and recovery identifiers. Plain-text passwords are encrypted at rest and never shown on screens or reports.

2 Account Registration & Signing In

PointPulse supports dual authentication: direct Gmail/Email with secure password, or one-click Google OAuth 2.0.

Step 2.1: Registering a New Operator Account

If you do not yet have an approved operator profile:

- **1. Access Portal:** Open your browser and navigate to https://pointpulse-8bbn.onrender.com.
- **2. Select Create Account Tab:** Click the "Create Account" tab at the top of the access card.
- **3. Fill Profile Information:** Enter your Full Name, your active Gmail address (e.g. laptopmew1@gmail.com), and choose a password (minimum 6 characters).
- **4. Submit Application:** Click the blue "Create Account" button.
- **5. Pending Approval Screen:** Your application is placed in pending review status. The Administrator (001.workme@gmail.com) will review and approve your account.

REAL-WORLD EXAMPLE: Operator Registration Form Values

Full Name:	`Laptop Mew`
Gmail Address:	`laptopmew1@gmail.com`
Password:	`••••••••••••` **(Encrypted with bcrypt 10 rounds)**
Initial System State:	`Pending Administrator Review`

Step 2.2: Logging In (Direct Credentials or Google OAuth)

Once your registration has been approved by the Administrator:

- **Option A (Direct Sign In):** Ensure "Sign In" tab is selected. Enter your Gmail address and password, then click "Sign In to PointPulse".
- **Option B (Google Sign-In):** Click the "Continue with Google" button below the login form and authenticate using your verified Google profile.

3 Navigating Your Operator Workspace

Upon signing in, your personalized dashboard provides immediate visibility into your assigned assets:

- **My Overview:** Real-time KPI summary showing your Total Active Accounts, Total Cumulative Points, Open Requests, and Available Rewards.
- **Active Accounts:** Your primary accounts workspace showing status, server, points, and action buttons for all live profiles.

- **Banned Accounts:** Dedicated repository for accounts that have been flagged, suspended, or require remediation.
- **Old & New Accounts:** Tenure-segmented view separating mature accounts from newly registered ones.
- **Available Rewards:** Interactive catalogue of vouchers, gift cards, and payout rewards eligible for redemption.
- **Request Center:** Ticketing hub to submit Account Corrections and request temporary Points Editing Windows.
- **Download Reports:** Self-service export hub to download your accounts and points history in CSV format.

4 Managing Your Account Portfolio

Under the "Active Accounts" menu, your assigned accounts are listed in a structured data table.

Table Columns Explained

- **PROF #:** The browser profile or system slot number (e.g. P1, P2, P3).
- **ACCOUNT IDENTIFIER:** The registered email or username for the account.
- **SERVER:** The proxy server or geographical exit node (e.g. US-AZ#146, US-DC#257).
- **CURRENT POINTS:** The current balance of verified points accumulated by this profile.
- **CLASSIFICATION:** Tenure badge indicating whether the account is classified as NEW or OLD.
- **STATUS:** Green ACTIVE badge or red BANNED badge.

Account Action Buttons

- **Details Button:** Opens the comprehensive Account Dossier. Contains 3 tabs: (1) Overview, (2) Credentials & Proxy information (server tags, recovery emails, masked secrets), and (3) Activity History logs.
- **Points Button:** View recent points ledger entries or submit a points update (unlocked during editing windows).
- **Edit Button:** Modify server tag, classification, or notes (unlocked during your Free Editing Period).

5 Adding Accounts: Single & Bulk Excel Upload

You can add new accounts to your portfolio during your active Free Editing Period using either single entry or bulk spreadsheet upload.

Method A: Single Account Addition

- **1. Click "+ Add Account":** Located on the top-right toolbar of the Active Accounts view.
- **2. Enter Details:** Provide Profile Number (optional), Account Email, Server tag, Initial Points, and Classification.
- **3. Save Profile:** Click "Save Account". The account is immediately bound to your operator profile.

REAL-WORLD EXAMPLE: Single Account Input

Profile #:	`P1`
Account Email:	`rathantata51@gmail.com`
Server / Proxy:	`US-AZ#146`
Current Points:	`-2500`
Classification:	`OLD`
Assigned Operator:	`laptopmew1@gmail.com`

Method B: Bulk Excel / CSV Upload

To import tens or hundreds of accounts simultaneously:

- **1. Click "Upload Excel":** Located next to the Free Editing Periods button on the toolbar.
- **2. Download Template:** Click the "Download Sample CSV" link in the modal to review exact column headers.
- **3. Format Spreadsheet:** Ensure your file conforms to the required specification below.
- **4. Upload File:** Select your .csv or .xlsx file and click "Import Accounts". The system validates each row and provisions the records under your ownership.

Column Header	Required	Example Value	Field Description
profile_num	Yes	P1	Browser profile slot / identifier
account_identifier	Yes	laptopmew.acc1@gmail.com	Account email address
server	Yes	US-AZ#146	Proxy exit node / server tag
current_points	No	5200	Current points balance (default: 0)
classification	No	OLD	Tenure badge (OLD or NEW)
status	No	active	Status (active or banned)

6 Free Editing Period & Read-Only Locking

Core Governance Mechanism: Free Editing Window

PointPulse safeguards portfolio integrity by limiting full write access to designated time windows. When approved, you receive an initial Free Editing Period (e.g. 24 or 48 hours). During this window, you have full privileges to add accounts, edit servers, and upload spreadsheets. When the timer reaches zero, your portfolio automatically enters Read-Only Mode.

Monitoring the Live Countdown Badge

When your window is active, a glowing green pill is displayed in the top navbar:

- **Active Indicator:** [#ñþ Free Editing Window: 18h 45m remaining]
- **Read-Only Indicator:** When expired, buttons change to read-only status and a tooltip directs you to the Request Center.

7 Request Center: Corrections & Points Windows

If your portfolio is in Read-Only Mode and you need to make changes:

Submitting an Account Correction Request

- **1. Navigate:** Click "Request Center" in the left sidebar.
- **2. New Request:** Click the "+ New Request" button.
- **3. Choose Category:** Select "Account Correction".
- **4. Specify Account:** Enter the account email and detail the required change (e.g. server update).
- **5. Submit:** The Administrator receives an instant notification and can approve the change with one click.

REAL-WORLD EXAMPLE: Account Correction Request Ticket

Request Type:	`Account Correction`
Account Email:	`rathantata51@gmail.com`
Subject:	`Update Server Proxy`
Correction Details:	`Please update proxy from US-AZ#146 to US-CA#102 due to IP rotation`
Ticket Status:	`Pending Administrator Action`

Requesting a Points Editing Window

If you need to batch update points across your portfolio:

- **1. Select Category:** Choose "Points Update Window" in the Request Center.
- **2. Specify Duration:** Request a 2-hour, 6-hour, or 24-hour editing session.
- **3. Activation:** Once the Administrator clicks Approve, your Free Editing countdown badge starts immediately.

8 Reward Catalogue & Redemption Workflow

Points earned by your managed accounts can be redeemed for institutional rewards:

- **1. Browse Catalogue:** Navigate to "Available Rewards" to view active gift cards, vouchers, and cash disbursements.
- **2. Check Thresholds:** Each reward item displays required points (e.g. 10,000 pts). The system automatically evaluates your accounts.
- **3. Click Redeem:** If your account qualifies, the "Redeem" button turns green. Click to initiate redemption.
- **4. Fulfillment:** Redemption claims appear in your Request Center. The Administrator approves and fulfills the voucher.

9 Periodic Reviews & Report Exports

Periodic Review Form (Admin Dispatched)

The Periodic Review Form does NOT pop up automatically or frequently. It is only dispatched when the Administrator specifically sends it to you to finish:

- **Dashboard Gate:** When the Administrator sends the form, your dashboard temporarily stops displaying and presents the review form.
- **Verification Questions:** Answer the verification questions confirming active accounts, accuracy, and current points.
- **Submit to Resume:** Click "Submit & Unlock Dashboard". Upon submission, your review state is marked complete and your dashboard immediately resumes displaying normally.

Exporting Reports

Navigate to "Download Reports" to export a clean, timestamped CSV spreadsheet of all your assigned accounts, current points balances, and redemption histories.
